

Sustainable development – poverty – equality - vulnerability

- Views
 - Appropriate prominence for the SD lense
 - Impacts of CC relevant to SD already evident
 - 2C goal has implications for SD
 - Mitigation/adaptation balance varies by country
- SDGs a multi-criteria tool, thread through report
 - Internationally agreed, targets defined, baselines \pm available
 - Direct SDG link to UNFCCC in goal 13
 - Broader relevance and balance aids integrated assessment through multiple lenses –
Poverty/Hunger/Health/Education/Gender equality/Water and sanitation/Afordable & clean energy/Decent work & growth/Cities & communities/oceans and terrestrial ecosystems (biodiversity)
 - Scaleable, from local community to planet
 - Ecosystem/societal resilience may not be well captured
